SUMMARY

I am an Assistant Professor of Health Policy and Management at Columbia University Mailman School of Public Health. I use quantitative methods from across disciplines to evaluate the health impacts of social safety net policies, including in the Medicaid, housing, food security, and education sectors. I also tackle methodological questions in health services research, like outcome measurement in claims data and statistical issues in the evaluation of social programs. My work has been published in leading journals, including *Health Affairs*, *JAMA Health Forum*, *Journal of Health Economics*, *American Journal of Public Health*, and *Journal of Policy Analysis and Management* and has been covered by *The New York Times*, public radio, and *Vox*.
